

ENDORSEMENT—The latest thing in home garbage and trash disposals, the new Calcinator, has received the unqualified endorsement of the Southern California Gas Co., according to Tenney Gray (right), dealer representative for the utilities firm. The Calcinator completely disposes of all garbage and burnable waste material by combustion. The heart of the unit is a tiny gas flame. With Gray is Milt Isbell, co-owner of Liberty Home Economy Co., exclusive franchise dealer in the South Bay area for the unique Calcinator.

Garbage-Refuse Disposal Endorsed by Gas Company

The reputation of the Southern California Gas Company stands behind the newest home garbage and trash disposal unit, the Calcinator, according to Tenney Gray. Gray, who is dealer representative for the utilities firm, stated this week that the gas company highly endorses and recommends the Calcinator.

"Southern California Gas Co. feels that the Calcinator is the greatest innovation brought out by gas appliance manufacturers in a decade for home disposal convenience," he declared.

Exclusive Dealer
The Calcinator, sold here exclusively by the Liberty Home Economy Co., 1623 Cravens Ave., completely disposes of all garbage and burnable trash by combustion.

A tiny gas flame dehydrates any burnable substance and then burns it completely, leaving only a small amount of fine white ash.

Tenney pointed out that the new household convenience has the approval of the American Gas Association and the Southern California Gas Company testing laboratories.

Many Tests
All gas appliances, he said, are

thoroughly investigated by the utilities firm. They are subject to gruelling tests which must be passed with a perfect score, if the endorsement is to be earned, he indicated.

"Liberty Home Economy Co. is an endorsed and recommended dealer of gas appliances. Southern California Gas Co. will not deal with any retail firm that does not meet the highest standards," Gray stated.

Jim Lawson, co-owner of Liberty Home Economy Co., reports that the disposal unit is now widely used in hospital and restaurants because of its economy of operation, complete efficiency, and absolute safety.

The cabin of the unit is of gleaming white enamel.
